Smart Computing. Smart Design Optimization

## Optimize Your Product. Make The Most Profit Out Of Your CAE Investment

SmartDO was applied on the real-world industrial design since 1992. With its robust and stable optimization solver, SmartDO has been used on different physics and disciplines to optimize the design, such as

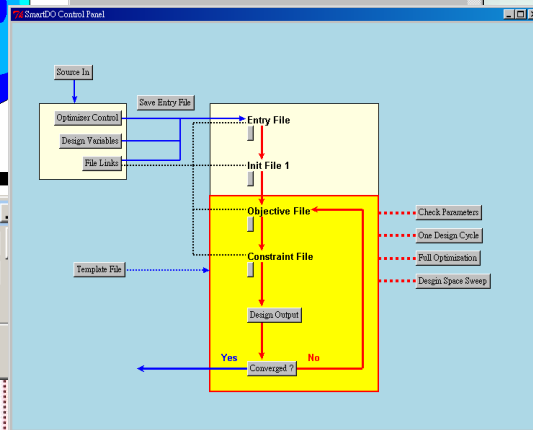

Structure/ Crashworthiness/ CFD/ Heat Flow/ Heat Transfer  
Structural/Thermal/Electronic Coupled  
Automatic Control

Gas Turbine Engines/ Fluid Power System/ Nuclear Energy  
Civil Structure and Resident Roof (Sizing, Shaping and Topology)  
Air Cargo Deck/ Thermoelectric Generator/ A-Arm of the Armored Tank  
Keyboard Rubber Dome/ Connectors/ Composite Structure/ Circulation Water Pump  
Wave Energy Converter/ Jet nozzle/ O-Ring Seal/ Golf Club Head  
Semi-Conductor/ Keratotomy Surgeries/ Shock Absorbing

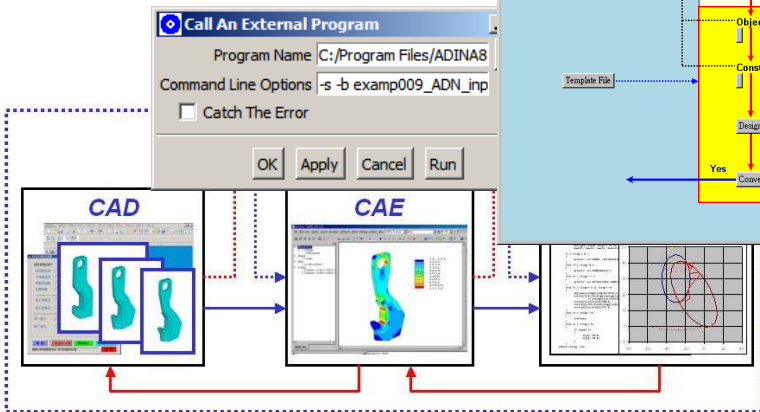

**Structural Optimization**

Variable Name	Lower Bound	Initial Value	Upper Bound
smartdo_x(1)	-0.07	0.00	0.07
smartdo_x(2)	-0.03	0.00	0.03
smartdo_x(3)	-0.07	0.00	0.07
smartdo_x(4)	-0.03	0.00	0.03

**Multi-physics**

**Engineering Lifecycle Integration**

**Concurrent  
Sizing/Shaping/Topology  
Optimization**

## Optimizer

- **All optimizer with Global Optimization capabilities, using Direct Global Search**
- **Gradient-Based Direct Global Optimization**
  - Tunneling and Hill Climbing
  - Local Optimizer with DV Normalized [1]
  - Conjugate Feasible Direction Method (CFDM)[1], Recursive Feasible Direction Method (RFDM)[1], Recursive Conjugate Feasible Direction Method (RCFDM)[1]
  - Smart Dynamic Search(SMDS)[1]
  - Applicable for differentiable problem. Also for both smooth problems or with noise [1,2]
- **The Robust Genetic Algorithms (RGA)**
  - Adaptive Penalty Function[1]
  - Automatic Schema Representation[1]
  - Automatic Population and Generation Number Calculation[1]
  - Adaptive and Automatic Cross-Over Probability Calculation[1]
  - Absolute Descent[1]
  - Concurrent Sizing, Shaping and Topology Optimization
  - Applicable for Binary(0/1) and Combinatory Optimization
  - Applicable for differentiable and non-differentiable problems
- **No limitation on number of Design Variables and/or Constraints.**
- **Accept infeasible design for the initial design and starting points. SmartDO will resolve the infeasibility before optimization.**
- **Support multi-thread computation[3].**

## Parametric Modeling

- Modifying the parameters third party packages (CAD, CAE, CAx) without access to its source code, Generally do not need additional package or module either.

## User Interface and Platform

- Main Menu : with pull-down menu interface
- Command Console : interactive command and/or batch mode
- Editor Canvas : Text editor and SmartDO specific functionality
- Control Panel : Execution flow control with visual flow charts and buttons
- Open Architecture. User-Programmable, built-in Tcl/Tk core
  - SmartScripting : Smart Tcl/Tk script generator.
  - SmartPET and PET (Preprocessor for Embedded Tcl/Tk) : Embedding Tcl/Tk scripting into any text input file on the preprocessing level
  - Supporting Objective Oriented Tcl/Tk scripting (after SmartDO version 6)
- SmartLink : Direct link with other packages. Import the parameters of third-party packages, arbitrarily cross-link with Design Variables, Objective Function and/or Constraint in SmartDO
  - ANSYS Workbench :
  - NX CAE

## NOTE

1. Proprietary algorithms.
2. Dealing with functions with local and minor to medium noise.
3. For specific software only.

***FEA-Opt Technology***

***R&D • Consultancy • CAE***

## Software Products and Services

- **SmartDO** : A Smart Design Optimization System and Services
- **System Integration and Design Automation**
- **CAE Analysis Consultancy Services** :
  - Structural reliability : stress, vibration, deformation, buckling, lifing/fatigue, stability, fracture mechanics, creep, plasticity, nonlinear, contact, dynamics, crashworthiness/impact.
  - Structural/heat/CFD/electrical coupled-field analysis
  - CFD/Heat Transfer/Heat Flow/Conjugate Heat Transfer
- **The Virtual Lab Technology**
  - Full Engine Module Fan blade-out and hub-burst simulation
  - Full car crash simulation
  - 3C product drop test
  - Weaponery ballistic and impact analysis
